# PACKAGING

## Polyliners

Plascon films, polyliners, and bags are manufactured in-house under strict quality control guidelines and are made from a variety of films that are USDA / FDA approved.

We have achieved British Retail Consortium (BRC) Global Food Safety Certification which is a leading global quality and food safety certification program. Plascon received certification for Packaging, with the scope of the certification including the manufacturing, conversion and warehousing of flexible packaging intended for use in food contact packaging applications.

Additionally, to provide the safest food grade liners for our customers, we are also certified by The American Institute of Baking (AIB). AIB International provides food safety audits, inspection, certification, and educational seminars worldwide to the food manufacturing and distribution industry and its suppliers, including finished foods and beverages products, ingredients, fresh produce, packaging production, and distribution facilities.

## Box Liners for Any Application

Plascon Blown Films manufacturing facility located in Traverse City Michigan has the capability to produce a wide variety of films for the food, pharmaceutical, and general packaging markets. Plascon polyliners offer a complete solution for packaging fresh and frozen foods, as well as commercial and industrial applications.

2. Place

3. Fold over Side

## Automated Box Lining Systems

Plascon Box Liners are compatible with all of the automated box lining systems on the market including:

- ▶ **Niverplast**
- ▶ **K&R Equipment**
- ▶ **Pattyn Packaging**
- ▶ **OK International Group**
- ▶ **Pearson**
- ▶ **Thiele Technologies**

Additionally, we will custom engineer roll stock to fit your specific application and machinery. Our manufacturing system creates a liner that is form-fit to the final container creating a custom look and maximizing product yield.

# EXPERTISE

## Square-Bottom Liners

Our square-bottom liners are designed to perfectly fit your specified box size to offer maximum space and protect your products from damage or contaminants.

- ▶ **LLDPE**
- ▶ **HDPE**
- ▶ **BLENDED LLDPE/HDPE**
- ▶ **BIODEGRADABLE**

**PLASCON**  
BIODEGRADABLE

Biodegradable films & liners are also available, offering the same strength and tensile properties as traditional non-degradable plastics.

- ▶ No toxic by-products
- ▶ Heat, light or mechanical stress not required to break down
- ▶ Does not require special handling
- ▶ Does not contain heavy metals
- ▶ Formulation meets FDA requirements

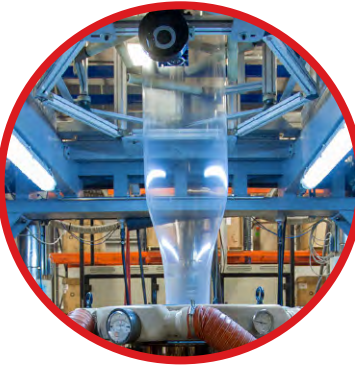

Plascon US Corporate Headquarters

### Made in the USA

Plascon films are manufactured in our Traverse City, Michigan blown films plant. As a manufacturer, we are able to identify and create exactly the right film to meet your application and needs. Our food grade liners are made using resins that are USDA / FDA approved, and are both BRC and AIB certified. Liners can be made in clear plastic or any color, and one-color printing is also available.
