Turn Key Plastic Bag and Toilet Tissue Manufacturing Programs

Plascon

WORK PROGRAMS

CREATE JOBS AND GENERATE RECESSION-PROOF REVENUE

How do you confront the realities of your budget while at the same time increasing opportunities for inmate rehabilitation? Join the many states partnering with Plascon to create job opportunities within their facilities. Our turn-key work programs allow you to produce your state's consumption of biodegradable trash can liners, recycled paper products, and more.

MANUFACTURE PRODUCTS WITH ENDLESS DEMAND

From plastic bags to toilet tissue, our work programs not only create new jobs that help rehabilitate inmates and reduce recidivism, they create profit. That's because these commodity products are always needed, even in the toughest economic times. Markets for these products include:

- State and local government agencies
- Schools and Universities
- Transit systems
- The Military

To understand the opportunity, consider the volume of these products that your organization uses every day.

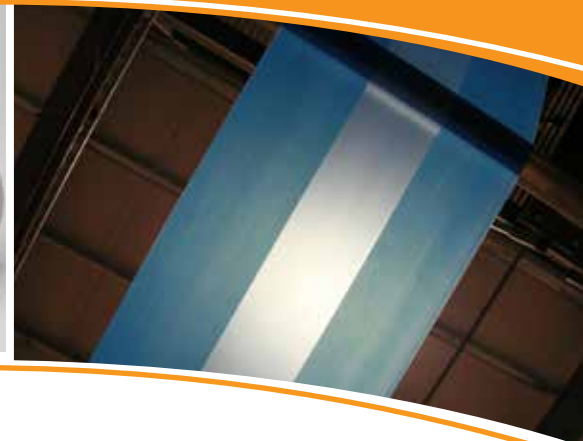

Your investment in a Plascon turn-key work program will return your investment twofold: by generating a new source of revenue and teaching inmates the job and life skills needed to successfully reintegrate into society.

STAY AHEAD OF THE ENVIRONMENTAL CURVE

Many governments and private companies are searching for ways to meet new green initiatives with products that are more environmentally-friendly. This creates a great opportunity for Correctional Institutions that partner with Plascon to make biodegradable trash can liners and toilet tissue with some recycled paper content.

LOWER INTERNAL COSTS

In addition to manufacturing plastic and paper products for sale, Plascon Work Programs help you lower internal costs by supplying all of the plastic bags, toilet tissue and paper toweling for your own organization's use. Many Correctional Institutions can cost justify the purchase of a Plascon Work Program simply through the cost savings that will be realized by producing products for internal use.

What our Current Programs Customers Have To Say:

"With Plascon's help, we turned a startup operation into a successful company grossing over \$1 million per year."

"To describe our business partnership in a word, I would have to say 'exceptional.' Plascon's customer service, technical support and industry knowledge are second to none."

"Plascon has always provided us with quality products at a great value. I truly value our partnership."

- Center Pull Towels
- Non-Woven Wipe Products

Missouri Correctional Industries Toilet Paper Manufacturing Startup

ENVIRONMENTALLY-FRIENDLY, NON-TOXIC, BIODEGRADABLE FILMS

Plascon's Biodegradable Films have been tested and proved as biodegradable and safe for the environment by ASTM D5209, ISO 14855 / ASTM D5338 and ASTM 5511 Standard Testing methods. All sorts of factors determine the amount of microbes available in the soil and the soil conditions determine the rate of degradation.

These products are high quality films that meet the same stringent specifications as standard products - including strength and tensile properties - and are available in any color, gauge, or print.

We provide the tools and support you need to be successful.

Equipment

Plascon provides the equipment needed for either the plastic bag or toilet tissue manufacturing program. Plastic bag program includes a BSM 1300 machine and hand trolley. Tissue program includes a converting machine, two lane log saw and out feed conveyor.

Installation, Training & Service

Installation and startup of your new equipment and a comprehensive on-site training program for your operators. On-Site service also available. Not sure how to set up your system? We can design the space you have to work efficiently.

Raw Materials

A structured raw material supply program is developed to meet your manufacturing needs. Materials are shipped directly to you and we even assist with inventory management and raw material storage system design. **All films used in our plastic bag program are made in the USA.**

Backup Manufacturing

For plastic bag manufacturing programs, Plascon has trained personnel and equipment available at our Traverse City, Michigan location to produce finished bags if needed.

Warranty

All equipment comes with a warranty, detailed instruction manuals, and spare parts delivery within 72 hours. Warranty varies by type of equipment. Ask for details.

Sales & Marketing Assistance

Plascon provides assistance identifying potential markets, notifying you of bid opportunities and building your customer base.
