

Plascon™

BOX LINERS

FOOD GRADE & COMMERCIAL/ INDUSTRIAL LINERS

Many products packaged in corrugated boxes, cartons or crates require the use of a liner in the final container to provide containment and protection. Plascon specializes in both food grade and commercial/industrial liner applications.

MADE IN THE USA

Plascon films are manufactured in our blown films plant located in Traverse City, Michigan. • As a manufacturer, we are able to identify and create the right film for your application and needs. Our food grade liners are made using resins that are USDA/FDA approved, and are BRC certified. Liners can be made in any color and one-color printing is also available.

AUTOMATED LINING SYSTEM COMPATIBLE

Our polyliners are compatible with all of the automated box lining systems on the market, including Pattyn Packaging, Niverplast, K&R Equipment, OK International Group, Pearson and Thiele Technologies. Additionally we will custom engineer roll stock to fit your specific application and machinery. Our manufacturing system creates a liner that is form-fit to the final container creating a custom look and maximizing product yield.

BIODEGRADABLE OPTIONS
ONE COLOR LOGO IMPRINT
SINGLE CASE QUANTITIES

MADE WITH USDA/FDA APPROVED RESINS

MANUAL BOX LINING SYSTEM AVAILABLE

For smaller quantities, Plascon's EasyLine Manual Bag Placement System increases production rates by up to 50%, and provides a more ergonomic work environment for employees.
