PLASCON WORK PROGRAMS

CREATE JOBS & GENERATE RECESSION-PROOF REVENUE

Our turn key work programs allow you to produce your state's consumption of biodegradable trash can liners, recycled paper products, and more.

How do you confront the realities of your budget while at the same time increasing opportunities for inmate rehabilitation?

Join the many states partnering with Plascon to create job opportunities within their facilities. Plascon provides the tools and support you need for success.

MANUFACTURE PRODUCTS WITH ENDLESS DEMAND

From plastic bags to toilet tissue, our work programs not only create new jobs that help rehabilitate inmates and reduce recidivism, they create profit. That's because these commodity products are always needed, even in the toughest economic times. Markets for these products include:

- State & Local Government Agencies
- Schools & Universities
- Transit Systems
- The Military

To understand the opportunity, consider the volume of these products that your organization uses every day. Your investment in a Plascon turn-key work program will return your investment twofold: by generating a new source of revenue and teaching inmates the job and life skills needed to successfully reintegrate into society.

NEW GREEN INITIATIVES

Many governments and private companies are searching for ways to meet new green initiatives with products that are more environmentally conscious. This creates opportunity for correctional institutions that partner with Plascon to make biodegradable trash can liners and toilet tissue with recycled paper content.

LOWER INTERNAL COSTS

In addition to manufacturing plastic and paper products for sale, Plascon Work Programs help you lower internal costs by supplying all of the plastic tubing, toilet tissue and paper toweling for your own organization's use. Many correctional institutions can justify the purchase of a Plascon Work Program simply through the cost savings that will be realized by producing products for internal use.

TURN-KEY WORK PROGRAMS INCLUDE:

EQUIPMENT

Plascon provides the equipment needed for the plastic bag and toilet tissue manufacturing program. The plastic bag program includes a Bottom Sealing Bag Machine and hand trolley. Tissue program includes a converting machine, two lane log saw and out feed conveyor.

INSTALLATION, TRAINING & SERVICE

Installation and startup of your new equipment and comprehensive on-site training program for your operators. On-site service also available.

RAW MATERIALS

A structured raw material supply program is developed to meet your manufacturing needs. Materials are shipped directly to you and we even assist with inventory management and raw material storage system design. All films used in our plastic bag program are made in the USA.

BACKUP MANUFACTURING

For plastic bag manufacturing, Plascon has trained personnel and equipment available at our Traverse City, Michigan location to produce finished bags if needed.

WARRANTY

All new equipment comes with a warranty, detailed instruction manuals, and a spare parts program is also available.

- Biodegradable Bags
- Trash Can Liners
- Biohazard Bags
- Laundry Bags
- Mattress Bags
